For an American audience, I thought this course may seem a bit foreign. But Mr. Hudson breaks down the basics of english-language speech in a universal way. Though this course may be marketed towards voiceover artists, I could see this as an appendage course for public speaking, persuasion, most any verbal communication course.

Great class if you're serious about becoming a voice actor. Steve Hudson does a great job explaining each different genre of the voice over industry and his experience is obvious throughout the entire course. Highly recommend.

I purchased this and a few other voiceover courses and decided to do this one first. In a little over 2 hours I have learned enough to change the way I do voiceovers forever, and will be forever more mindful of the way I speak when doing presentations and my podcast. Thank you for a great course.

At this point, I am a professional voiceover artist, this course will take you to the PRO level (no kidding).

At the onset, I came to realize my mistakes, how wrong I was all along. The mental comma principle indeed delivers the message across.

I had always wanted a course on Voice Overs. This course simplified it even though consistent practice is recommended. Thanks Hudson for making the attractive and easy to follow.

Interesting! I learned something new. I am excitedly looking forward to applying my new learnings to ministry work, and hopefully, to voice over projects. Thank you very much, Steve!

Good short practical course on how to become a better voiceover. Which is a skill which can become very handy. Its packed full of content course in just only 1 hour. As not a native speaker it was not that easy to do the exercises.:) But it was fun to try to improve (speaking) with more energy, controlling speed, pace etc. Will try to redo the courses many more times to improve.

This course is hands on, You start improving how you read and apply your voice in the first 20 min. You are given the tools and all you need to do is apply, compare and practice.

A really excellent voice over course. Great content and teaching style. Concise, well-structured, enjoyable and effective.

Eddie Pratt

Very comprehensive course! As an author who records my audio books, this course helped me to capture and remain mindful of the nuances of delivery that will make a marked difference in my general communications as well.

I've taken several other voice over courses and even though this course is shorter than the others, it contains a plethora of information that can not be overlooked, It has made me gain more confidence and knowledge to the art of becoming a voice over personality, knowing that I can attack my next project confidently. A must have for anyone serious about learning how to speak and phrase properly. Very, very well done.

This course **delivers exactly what it says it will**. At the beginning of the course you are asked to record a number of lines to the best of your ability so you can compare it with what you sound like at the end. **I was skeptical** about how much I was improving during the course... I mean, sure, I learned some good advice but I didn't feel any huge improvement. **Then I recorded the final readings and compared them to my firsts and wow... mind blown!**

This course gives basic advice and intriguing explanations for **how to improve your voice while reading a script that has monumental results**. ...All in all this is a course where **the results speak for themselves** and I highly suggest it. (2,3)

Fantastic course, within the first going over of the course my recording voice has markedly improved. I wanted to improve my voice in order to record my own audio books and i wasn't disappointed, i feel a lot more confident now and am excited to hear what my voice sounds like after the hourly practice recommended by the course creator. If i could give it 6 stars i would!!

The information given in this course was simple but powerful. It was explained well and succinctly, so no time was wasted on fluff or filler.

Jennifer Stogner-Lee

Nice class - thanks a lot - made me pick up my microphone and start an old recording software to practice some story telling

Hannes Wissing

Only just started but so far so good. Some great tips, very well explained. In particular, I like how there are exercises throughout, with an emphasis on practice. Looking forward to progressing with the course!

Update: Finished the course and very impressed. Just listened to the difference between my 'after course' recordings and my 'before course' ones and the improvement is dramatic.

Thanks!

This is clearly a man that, besides his talent and beautiful voice, knows his stuff and is willing to share it. Though voice over and voice acting can be described and exercised in many and deeper ways, I'm happy to have come across this course :-)

It's been 3 days and about 5 hours, I already love what I'm learning. I can notice improvement in my voice already. Let's power on. Totally worth it. Thank you Steve!
